Hi Carl! Sorry to bug you again -- can you zoom out on the PDF so we can see the whole slide? It's not coming through on our end, just part of the page. Thank you!!

May 5, 2021, 1:17 PM, from Paige Williams to everyone
It was really Kunjal Patel who created the amazing word cloud of George!

May 5, 2021, 1:18 PM, from Claire Berman to everyone
Thank you so much to Kunjal for the beautiful word cloud of George -- and so wonderful that this award will be named in honor of George!

May 5, 2021, 1:18 PM, from Brad Karalius to everyone
Beautiful graphic, Kunjal and Claire!

May 5, 2021, 1:18 PM, from Kunjal to everyone
It was really ALL of us!

May 5, 2021, 1:22 PM, from Liz Salomon to everyone

Thank you for those beautiful tributes, Ellen, Mary and Russ, and for the amazing word cloud, Kunjal, Claire and everyone who contributed to it! It means a lot to feel Bill, Shelley and George's memories close to our hearts as we launch our Spring Meeting today.

May 5, 2021, 1:23 PM, from Brad Karalius to everyone

Looks like the propensity score matching didn't account for access to health care. I wonder how the two cohort compared on that factor.

May 5, 2021, 1:33 PM, from Carl Riley to everyone

Please type in your questions or comments and send them to "Everyone" When there is a break point they will be addressed.

May 5, 2021, 1:39 PM, from Paige Williams (privately)

Carl, don't know if Ellen already told you this, but we decided NOT to show that YouTube video during the break. There were concerns about not allowing discussion of it

May 5, 2021, 1:40 PM, to Paige Williams (privately)

Thanks for letting me know.

May 5, 2021, 1:58 PM, from Kate Powis to everyone

Great presentation. Great work Denise, Sue and Brad!

May 5, 2021, 1:58 PM, from sandra burchett to everyone

what a wonderful discussion, thank you: great blend of heart and science with a path forward

May 5, 2021, 1:58 PM, from Claire Berman to everyone

Wonderful presentation, Denise and Sue!

May 5, 2021, 1:58 PM, from Mariam Davtyan to everyone

Fantastic presentation. Thank you Denise and Sue!

May 5, 2021, 1:58 PM, from Stephanie Shiao to everyone

Great presentation! Amazing to see these data come together.

May 5, 2021, 1:59 PM, from Patricia Garvie to everyone

Was there a rise in adherence to ARVs in response to fears about COVID?

May 5, 2021, 1:59 PM, from Danish Siddiqui to everyone

that was great insight - thank you

May 5, 2021, 1:59 PM, from Mary Anne Kolobow to everyone

great question, Patti!

May 5, 2021, 1:59 PM, from Russ Van Dykie to everyone

Do you think we can get pre-COVID data for the stressors and emotional data from the forms we use - particularly in AMP Up?

May 5, 2021, 1:59 PM, from Patricia Garvie to everyone

And, did any of the research reviewed demonstrate any protective benefit against COVID other than improved CD4 counts by proxy.

May 5, 2021, 1:59 PM, from Deborah Kacanek to everyone

Beautiful presentation, Denise and Sue!!! So exciting to see this data and thank you for your leadership on this!

May 5, 2021, 2:00 PM, from Carl Riley to everyone

Please type in your questions or comments and send them to "Everyone" When there is a break point they will be addressed.

May 5, 2021, 2:01 PM, from Stephen Spector to everyone

Is there any data on the percent positivity among the PHACS cohort versus the regional percent positivity at the same time?

May 5, 2021, 2:01 PM, from Arry Dieudonne to everyone

Sorry ! it was a mistake. I have no micro access where I am at

May 5, 2021, 2:02 PM, from Veronica Figueroa (privately)

thank you for sharing this with us. I'd be interested if there are plans to look at qualitative data from comment section. Thank you again!!

May 5, 2021, 2:08 PM, from Patricia Garvie to everyone

sorry, I realized my previously posed question was missing a key element...

May 5, 2021, 2:09 PM, from Patricia Garvie to everyone

Did any of the research reviewed/presented demonstrate benefit of ARVs as protective against COVID-19, other than improved CD4 counts by proxy?

May 5, 2021, 2:09 PM, from Murli Purswani to everyone

Do we keep AMP still going at our local IRB sites, as we move into the new cycle of PHACS 2020?

May 5, 2021, 2:10 PM, from Joel Zhang to everyone

AMP is closed

May 5, 2021, 2:10 PM, from Murli Purswani to everyone

Same question with previous versions of SMARTT - wont we need data and so it needs to still be kept active at local IRBs and not closed out

May 5, 2021, 2:11 PM, from Sharon to everyone

Do we know if we have any COVID long-haulers or cases of COVID neurological sequelae among our participants?

May 5, 2021, 2:12 PM, from Mary Anne Kolobow to everyone

Murli, Continuing to work with the AMP data will require the study remaining open with the IRB for analyses and queries.

May 5, 2021, 2:12 PM, from Patricia Garvie to everyone

The IRB question may be institution specific. Some note closed to enrollment but open to follow up for analyses, pubs, etc. Other sites may not have the same requirement by their IRB.

May 5, 2021, 2:12 PM, from Murli Purswani to everyone

Yes AMP is closed but we may need to access data still from sites. Or will queries and other questions no longer be available?

May 5, 2021, 2:13 PM, from Paige Williams to everyone

Thanks for responding Mary Anne!

May 5, 2021, 2:13 PM, from Murli Purswani to everyone

Yes thanks. We will leave AMP and older SMARTT protocols going with local IRBs

May 5, 2021, 2:19 PM, from Liz Salomon to everyone

Thank you for the question and follow-up about IRBs. Please do not hesitate to let me and/or Anisa Khadraoui, our PHACS/HOPE Regulatory and Compliance Manager, know if you have any questions or concerns in follow-up. Additionally, a recording of our training on the transition to sIRB may be found on the PHACS website here: <https://my.phacsstudy.org/document/310/training-materials->

May 5, 2021, 2:22 PM, from Patricia Garvie to everyone

How is disease determined: Are there genetic differences that influence disease risk?

Do races differ in their genetic predisposition to disease? If so, how?

Is there something else you would like to add?

May 5, 2021, 3:43 PM, from sandra burchett to everyone
could we have the questions again? 1) genetic differences influence disease risk? 2)?

In the PHACS AMP study, we have performed whole genome sequencing so we have genetic ancestry markers, We have debated how best to use them in our analyses. Suggestions? I know the answer will be, depends on the question.

Counterfactual theory!

May 5, 2021, 4:12 PM, from Kunjal to everyone

If only 10-30% of life expectancy is determined by genes, what environmental exposures should we be measuring since our goal is to prevent disease and mortality?

May 5, 2021, 4:17 PM, from Kathy Tassiopoulos to everyone

Such a great talk - thank you!

May 5, 2021, 4:22 PM, from Claire Berman to everyone

What do you see as some of the best ways to measure these differential exposures to environmental factors that impact health outcomes -- from PM2.5 to police/state violence? We have been considering using geocoding as one way to do this, bringing in data from existing databases, but I'm curious if you have thoughts on how we can best approach this.

May 5, 2021, 4:22 PM, from Brad Karalius to everyone

This is such an important point. Still trying to fully wrap my head around it. Thank you, Dr. Graves, for a wonderful talk.

May 5, 2021, 4:25 PM, from Chivon McMullen-Jackson to everyone

Racism plays a huge role in low self-confidence, which leads to other disparities. Do you recommend spending research efforts on improving this area.

May 6, 2021, 1:34 PM, to Emily Barr (privately)

try again please

May 6, 2021, 1:44 PM, from Emily Barr (privately)

so now it looks like I can send to you, the presenter or any individual but I dont see a choice for "Everyone"

May 6, 2021, 1:44 PM, to Emily Barr (privately)

it should be at the top

May 6, 2021, 1:45 PM, from Emily Barr (privately)

Its not. At the top in bold is you, the presenter then a line then all of the participants under the line.

May 6, 2021, 1:45 PM, to Emily Barr (privately)

but if you cant then just send your comments or qustions to me and I will post in the chat for you

May 6, 2021, 1:46 PM, from Emily Barr (privately)

ok -I just wondered of others had this same problem. I will ask a couple of my colleagues privately if they can see "Everyone" as a choice.

May 6, 2021, 1:48 PM, to Emily Barr (privately)

I have a 2nd laptop next to me and I see Eveyone on it as an option

May 6, 2021, 1:49 PM, to Emily Barr (privately)

let me know what your colleagues say

May 6, 2021, 1:52 PM, from Sandra Burchett (privately)

may we chat to the group or are you managing the chat line? if you are minding the chat, please pass on "this is incredibly interesting Dr. James-Todd. I am unaware that there is any messaging around these environmental/product issues in the OB clinics, or that providers include these risks in prenatal clinic visits. Perhaps I am wrong though.

May 6, 2021, 1:54 PM, from Sahera Fargo (privately)

Wondering in addition to environmental toxins what about outdoor air pollution (particulate matter)?

Incredible, incredible presentation, Dr. James-Todd!

May 6, 2021, 1:57 PM, from Paige Williams (privately)
Sandy is right - the "everyone" option does not appear. Just individuals.

Thank you for such an informative and incredible presentation, Dr. James-Todd!

May 6, 2021, 1:58 PM, from Kunjal to everyone
Excellent talk Dr James-Todd! We know health outcomes are multifactorial and we all seem to focus on specific exposures of interest in our respective fields. I'm wondering how we can look more holistically or thinking about population attributable risks of all the exposures we look at for high impact interventions.

May 6, 2021, 1:58 PM, from egchadwick to everyone
Wonderful talk!!!

May 6, 2021, 1:58 PM, from andrew wiznia to everyone
Thank you. great talk. Is there a large variability in rates of absorption and/or metabolism of phthalates between individuals.?

May 6, 2021, 1:58 PM, from Raiko Johnson to everyone

This was very informative and I would love to learn so much more and hope that we can implement this more in all that we do. Thank you so very much for presenting and providing this information.

May 6, 2021, 1:58 PM, from Mary Anne Kolobow to everyone

"everyone" is available, Carl

May 6, 2021, 1:58 PM, from Hanna Major-Wilson to everyone

May 6, 2021, 1:59 PM, from Jamie Russell-Bell to everyone

This was amazing. Thank you for sharing your work, Dr. James-Todd

May 6, 2021, 1:59 PM, from Russ Van Dyke to everyone

Are there skin/hair products used in infants and children with similar concerns?

May 6, 2021, 1:59 PM, from Nina K. Sublette (privately)

Any info re impact of PCP on pre-eclampsia?

May 6, 2021, 1:59 PM, from Eduardo Vergara to everyone

I never expected to learn in depth about the intersection of health and hair products. Amazing and enlightening presentation!

May 6, 2021, 1:59 PM, from Andrew Wiznia to everyone

Additionally, have you looked at skin disorders as another co-variable. For example, it is known that these products (parabens, phthalates) caused dermatitis, exacerbate eczema and may increase (dramatically) exposure.

May 6, 2021, 2:00 PM, from Tracy Wolbach to everyone

This was a wonderful and informative presentation! Thank you!!!

May 6, 2021, 2:00 PM, from Liz Salomon to everyone

Yes. Thank you for a truly wonderful presentation and for inspiring us to consider many more ways that we can examine and, hopefully, impact the intersections of environmental, reproductive, beauty and racial justice in our work in PHACS. Thank you so much, Dr. James-Todd!!

May 6, 2021, 2:00 PM, from Lisa Frenkel to everyone

Does the EPA or FDA or other agency have any regulatory authority on these substances?

May 6, 2021, 2:01 PM, from Kathy Tassiopoulos to everyone

Fantastic presentation! Thank you much for sharing this work with us.

May 6, 2021, 2:01 PM, from egchadwick to everyone

Thank you again for a wonderful talk! Any information on "second-hand" exposure to some of these products, i.e. if others in the home are using the products or do the products need to be applied directly?

May 6, 2021, 2:01 PM, from sue siminski to everyone

Thank you Dr. James-Todd for such a stimulating, thought-provoking presentation!

May 6, 2021, 2:03 PM, from kim to everyone

do you have a list of products that you would give to a mom who want to go natural

May 6, 2021, 2:03 PM, from Lisa Frenkel to everyone

I see articles about these substances by investigative reporters. Should "we", the medical establishment, inform or lobby members of congress?

May 6, 2021, 2:06 PM, from Russ Van Dyke to everyone

What about sunscreens?

May 6, 2021, 2:06 PM, from Claire Berman to everyone

You may be able to look up specific products for safety ratings at the Environmental Working Group website that Dr. James-Todd mentioned: <https://www.ewg.org/skindeep/>

May 6, 2021, 2:07 PM, from Paige Williams to everyone

Some of the work we did in our Russian Children's Study showed lead, pesticides, and dioxins were associated with later puberty, but in a mediation analysis we found that much of this delay was attributable to decreased growth. The mechanism for parabens and phthalates seems to be much different though, right? And maybe the opposite direction?

May 6, 2021, 2:08 PM, from Paige Williams to everyone

Oh no, I misspelled phthalates!

May 6, 2021, 2:11 PM, from Brad Karalius to everyone

This talk was absolutely amazing. Given that a good deal of these chemicals are lipophilic, I wonder how we best account for that with people of different body structures, and it almost seems there could be a feedback loop with weight and these endocrine disruptors.

May 6, 2021, 2:12 PM, from kim to everyone

thank you

May 6, 2021, 2:12 PM, from James Blood to everyone

May 6, 2021, 2:23 PM, from Sandra Burchett to everyone

May 6, 2021, 2:24 PM, from Lynn Yee to everyone
Age is a U-shaped covariate with HDP -- more prevalent in the very young and older mothers

May 6, 2021, 2:24 PM, from Murli Purswani to everyone
It would be interesting to look at resolution or not after delivery?

May 6, 2021, 2:25 PM, from Murli Purswani to everyone
Resolution of hypertension, that is

May 6, 2021, 2:25 PM, from Lynn Yee to everyone
Yes definitely! Chronic hypertension after preeclampsia will be a good next step in this and in HOPE

May 6, 2021, 2:39 PM, from Carl Riley to everyone

A couple of the OR for preterm birth were pretty large.

May 6, 2021, 2:41 PM, from Murli Purswani to everyone

May 6, 2021, 2:52 PM, from kim to everyone

It would be interesting to look at the group with inadequate wt gain.

May 6, 2021, 2:56 PM, from Emily Barr to everyone

May 6, 2021, 3:29 PM, from Julie Huldtquist to everyone

What is the STAR study, just mentioned?

May 6, 2021, 3:31 PM, from egchadwick to everyone

May 6, 2021, 3:36 PM, to Liz Salomon (privately)
Liz it may be coming from one of the speakers who is not talking. Everyone seems to be muted. but I will keep looking.

May 6, 2021, 3:37 PM, from Liz Salomon (privately)
OK. I'm hearing it when Deb's talking so it may be her mic. Thanks so much!

May 6, 2021, 3:38 PM, to Liz Salomon (privately)
no problem

May 6, 2021, 3:38 PM, from Toni Frederick to everyone
Are there follow-up visits in HOPE?

May 6, 2021, 3:39 PM, from sue siminski to everyone
HOPE, as its own study, will be collecting data under the study label HOPE and its own eCRFs, but the data will be made available into the PHACS central database with the other PHACS studies

May 6, 2021, 3:40 PM, from Claire Berman to everyone

I was wondering how we could engage with community based organizations or local health departments that work on womens health to begin the work on translating our research.

May 6, 2021, 4:30 PM, from Raiko Johnson to everyone

I would also love for HOPE to support the continuity of care of women living with HIV with their OBGYN providers. Also working to normalize the care that women living with HIV are receiving so that the cares they receive for reproductive health, Gyn care and overall health are easier to navigate and also become normalized so the discomfort for the mothers aren't there. Just working on creating an overall normalcy and continuity of care for women living with HIV.

May 6, 2021, 4:32 PM, from Kate Powis to everyone

your right, they can help us identify research gaps.

May 6, 2021, 4:32 PM, from James Blood to everyone

i agree, kunjal! ATN had a community mobilization effort which included a coalition of community stake holders

May 6, 2021, 4:33 PM, from Kunjal to everyone

Thats where i got the idea James! I noted that at the ATN meeting and think we should do the same.

May 6, 2021, 4:34 PM, from Denise Russo to everyone

Godd point Kunjal!

May 6, 2021, 4:34 PM, from Emily Barr to everyone

I agree with considering a community mobilization effort. Reaching those who are not already part of phacs will likely be a challenge across sites. (We did that through the ATN as well.)

May 6, 2021, 4:34 PM, from Deborah Kacanek to everyone

I love this idea. Let's do it!

May 6, 2021, 4:35 PM, from Kunjal to everyone

James and Emily you guys can guide us on how that process worked in the ATN

Happy to. :)

May 6, 2021, 4:35 PM, from Liz Salomon to everyone

I love the idea of merging the former C2P model from ATN into our work. It was a very powerful community-research coalition-based partnership approach and could be very well applied in our work.

May 7, 2021 4:42 PM from Lisanne Jenkins to everyone: Incidental findings are very rare

May 7, 2021 4:47 PM from Nancy Liu to everyone: If scanning procedures do reveal an abnormality to casual observation of the technician or one of the investigators involved in the project, the clinical site PI will be notified. The clinical site PI will share the information with the participant and their caregiver as appropriate and clinical referrals will be initiated, if needed.

May 7, 2021 4:48 PM from Kate Gibbons to everyone: It'll be important to clarify that it is not a diagnostic MRI to the family's to prevent any confusion regarding results down the line.

May 7, 2021 4:49 PM from Russ Van Dyke to everyone: There must be a lot of experience in the ABCD study about incidental findings on. the MRI
